## Notes

---

- States your goals for employment, typically one or two sentences.
- The most effective one is for the job you are applying for:
  - What kind of job am I seeking?
  - What skills do I have that make me ideal?
  - Where have I been and where do I want to go?
- Write a new objective for each job you apply for
- Only talk about goals feasible within the company
- Include information that highlights your experience
- Make sure that the objective is not all your hopes and dreams or something too generic  
Keep in mind what the company needs/wants
- Takes the form of:

"Seeking a position at [Company] where I can, [goals], utilizing my [skills]"

or

"[Person] seeking position in [Company] where I can apply [skills]"

- Make sure that the objective is not all your hopes and dreams or something too generic
- Keep in mind what the company needs/wants
